

The CFA Cropper

The fast, safe method of reducing cast in-situ, circular, concrete piles.

The **CFA Cropper** will cut circular concrete piles from 300mm diameter and upwards of 1200mm. It's modular design allows it to be adjusted to suit different pile sizes on site.

Using the CFA pile cropper, an average 300mm circular pile can be reduced to your required level in as little as 3 minutes, compared to an average 45 minutes when manually cut using hammers and breakers.

THE CFA CROPPER									
Pile Size (mm)	300	450	550	650	750	850	950	1050	1150
Machine Carrier Class	6/20	10/20	13/20	13/20	13/20	13/20	13/20	13/20	13/20
Oil Flow L/Min (tonne)	40/80	40/80	40/80	40/80	40/80	40/80	40/80	40/80	40/80
Operating Oil Pressure Max (bar)	210	210	210	210	210	210	210	210	210
Height (mm)	400	400	600mm clearance required from edge of pile on all C.F.A Piles						
Width (mm)	1300	1400							
Length (mm)	1300	1400							
Weight (kg)	680	882	992	1102	1257	1367	1635	1745	1870
