

The Power Cropper

The Power Cropper is used for ultra fast pile reduction and has two functions for cutting pre-cast, four bar piles.

The **Power Cropper** is a very powerful machine specially designed to be used in any application including trenches and other confined spaces. It is used by being suspended from the dipper arm of an excavator to achieve one of the following:

Function 1: The Power Cropper can break off the pile and rebar in one go to enable you to rapidly reduce the pile to a desired level, then dump the waste straight into a dumper or allocated site area.

Function 2: The Power Cropper is then used to 'nibble' the pile, causing the concrete to fracture and leaving the rebar exposed.

THE POWER CROPPER		
Pile Size (mm)	200/300	350
Machine Carrier Class (tonne)	13/25	13/25
Oil Flow L/Min	40/80	40/80
Operating Oil Pressure Max (bar)	210	210
Height (mm)	1200	1200
Width (mm)	650	700
Length (mm)	1300	1400
Weight (kg)	1100	1200
