

# The Trench Cutter

**This cropper has been successfully used in the housing industry when house footings have to be kept to a minimum, making considerable savings on concrete.**

The **Trench Cutter** is used for cutting 300 – 400mm piles in a trench of only 700mm wide.

This machine is unique to Mr Cropper and has become a favourite with Housing Groundworks Contractors who fully appreciate the saving on concrete that can be achieved compared to other Croppers on the market.

THE TRENCH CROPPER		
	STANDARD	LARGE
Pile Size (mm)	300	400
